### EXPERIENCE

#### Senior Full-Stack Developer 01/2024 - Ongoing

- [SAP](#)
- Contributed to the development, extension, and maintenance of the Customer Data Hub application within the SAP Business AI organization, using SAP CAP, SAP Fiori for the Web, SAP UI5, and React on top of SAP BTP
  - Advanced to UI Development Lead through demonstrated expertise, where I supervised all front-end development activities while actively ensuring cohesive alignment with back-end functionalities
  - Served as Product Owner for the UI stream for three consecutive quarters, working closely with stakeholders, defining roadmap items, prioritizing features, and creating backlog items
  - Led the UI design for the application's 2.0 version, independently learning Figma and leveraging Fiori Design System with SAP Fiori Web UI Kit to deliver comprehensive Figma designs

#### Software Developer 03/2021 - 08/2022

- [Quantive \(formerly Gtmhub\)](#)
- Member of the data ETL team
  - Expanded the platform's data integration capabilities by incorporating new data sources to the platform based on third party JDBC drivers
  - Transitioned into front-end development and became the go-to front-end developer for the team
  - Developed functional and robust web pages and components with TypeScript, AngularJS, Less, and Pug
  - Independently developed crucial front-end functionality for one of the company's major clients (Adobe), showcasing autonomy and proficiency in delivering client-focused solutions

#### Java Software Developer 01/2019 - 01/2021

- [Fadata](#)
- Developed and extended business solutions for the INSIS web application using Oracle ADF Framework
  - Contributed to both client projects customizing the core INSIS version to meet the unique needs of different clients, and core INSIS platform development, showcasing versatility and adaptability in diverse tasks
  - Led client training sessions, empowering them to effectively utilize the INSIS platform and its features

#### Junior Software Engineer 01/2017 - 01/2019

- [Telco Systems](#)
- Member of the Cloud and Virtualization team, contributing to the development of an NFV ARM Solution
  - Developed CLI using Bash and Python to enhance user interaction and system management
  - Created and customized in-house Debian packages

### LANGUAGES

Bulgarian

Native

English

Proficient

German

Beginner

### TOOLBOX

#### Programming languages and technologies

JavaScript   TypeScript   Node.js   Java   Python

Go   jQuery   HTML   CSS   Sass   Less   Bootstrap

#### Frameworks

React   Angular   AngularJS   Jest   SAP CAP

SAP UI5   Spring   JUnit   Oracle ADF

#### Databases

MySQL   PostgreSQL   MongoDB   Oracle

SAP HANA

#### Tools

Git   Bitbucket   GitHub   VS Code   IntelliJ IDEA

Bash   Jenkins   SAP BTP   Jira   Figma

Adobe Illustrator   Adobe Photoshop

### SOFT SKILLS

Persistence   Perseverance   Discipline

Team Player   Empathy   Positivism

Lifelong learner   Adaptability   Curiosity

Ambitious person   Detail-Oriented   Reliability

Cultural sensitivity

### EDUCATION

Graphic Design

05/2023 - 12/2023

[SoftUni Creative](#)

Master of Engineering - MEng, Computer Systems Networking and Telecommunications

09/2016 - 02/2018

[Technical University of Sofia](#)

Erasmus+ Exchange Program, developing a thesis for an undergraduate degree

05/2016 - 09/2016

[Hochschule Fulda](#)

Bachelor of Engineering - BE, Telecommunications

09/2012 - 02/2016

[Technical University of Sofia](#)
